Recycle rain water and yard waste
An easy (and cheap) way to green up your yard this spring.

St. Paul, MN - Minnesota may have another round or two of winter weather, but it is never too early to begin planning for spring gardening. The Recycling Association of Minnesota (RAM) is once again offering an easy solution to green up your backyard this Spring by providing inexpensive rain barrels and compost bins for Minnesota residents at wholesale price. By composting organic waste (vegetable scraps and yard waste) and capturing rainwater from the roof, you can reduce the need for expensive fertilizers and reduce your water bill.

To ensure you receive yours at the discounted price, Minnesota residents must pre-order on RAM's website, www.recycleminnesota.org. There are several distribution events this spring throughout the metro area as well as greater Minnesota so it is easier and more convenient than ever to get a rain barrel or compost bin this Spring. RAM provides everything you need to get started-a guide on how to use a rain barrel and composting best practices created by industry experts.

Pre-ordered compost bins and rain barrels will be available for pick up April through June at various location, see the website for details. For more information and to order visit www.recycleminnesota.org.
